

RISHABH KUMAR

New Delhi, India | +91-8595346353 | rishabhkumar1211@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 4 years of experience architecting and delivering scalable, cross-browser compatible web and mobile applications using React.js, Next.js, TypeScript, and React Native. Proven team lead with hands-on experience mentoring developers, defining frontend architecture, and driving technical decisions across education and enterprise platforms. Skilled in LLM API integration, AI-assisted development (GitHub Copilot, Cursor), Docker, CI/CD, and web performance optimization (Lighthouse 90+, Core Web Vitals). Track record of reducing approval times by 50–60%, boosting user engagement by 45%, achieving 80%+ test coverage, and processing 50K+ daily data points at 99% accuracy.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Redux, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Material-UI, Ant Design, PWA (Progressive Web Apps), Web Performance Optimization, Lighthouse, Core Web Vitals, Lazy Loading, Bundle Size Optimization, Cross-browser Compatibility, Responsive Design, Jest (80%+ coverage)

Backend & DevOps: Node.js, Python (FastAPI), Java, Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD Pipelines, Firebase, Databricks, Payment Gateway Integration (Stripe, PayPal), Syncfusion, PDFTron, Jira

AI & LLM Tools: LLM API Integration (OpenAI, Groq/Llama 3.1), GitHub Copilot, Cursor IDE, ChatGPT (GPT-4), Claude AI, v0 by Vercel, Bolt.new, Lovable, Prompt Engineering, AI-powered UI scaffolding, Vibe Coding

Leadership & Practices: Team Leadership, Technical Mentorship, Frontend Architecture Design, Code Reviews, W3C Web Standards, SDLC, REST API Integration, Agile/Scrum, Component-Driven Development, Containerization

PROFESSIONAL EXPERIENCE

Senior Software Engineer | MagicEdtech, Noida

Jan 2025 – Present

- Mentored and led 5 developers on DataHub — assigning tasks via Jira, conducting daily standups, and performing code reviews to ensure on-time delivery and high code quality across all sprints.
- Architected the end-to-end frontend of DataHub (education analytics platform), establishing component structure, Redux Toolkit state management strategy, and API integration patterns adopted team-wide.
- Integrated LLM APIs into DataHub to build a student retention prediction system, analyzing behavioral patterns to identify at-risk students and enabling proactive intervention by educators.
- Engineered CheckRide Pro, an FAA checkride booking platform across 2+ user roles; achieved 60% reduction in approval time and streamlined pilot certification scheduling end-to-end.
- Implemented CI/CD pipelines via GitHub Actions across dev, staging, and production environments — eliminating manual deployment errors and cutting release cycle time by 40%.
- Containerized services using Docker and Docker Compose, reducing environment setup time by 70% and ensuring consistency across the development team.
- Consumed Databricks output data into the DataHub frontend, powering real-time analytics dashboards surfacing insights across multiple student data streams for business stakeholders.
- Designed and integrated 10+ Python FastAPI REST endpoints, enabling seamless data flow between backend services and React.js frontend with sub-200ms average response times.
- Optimized web performance using Lighthouse audits, lazy loading, and bundle size reduction — consistently achieving Lighthouse scores of 90+ and Core Web Vitals compliance.
- Achieved 80%+ Jest unit test coverage on DataHub, reducing regression bugs and strengthening release confidence across every sprint.
- Delivered Al-Jabr Laundry frontend using React.js and Next.js, boosting user engagement by 45% and reducing bounce rate by 10% through UX and performance improvements.

Software Developer | Costacloud, Okhla NSIC, New Delhi

Jun 2022 – Jan 2025

- Designed frontend architecture for TeamSync — a real-time collaboration platform with Drive-like file management, notifications, and chat — defining WebSocket strategy and scalable component patterns from scratch.

- Built and deployed a Paperless Office approval workflow across 4+ departments, cutting time-to-approval by 50% and eliminating manual coordination bottlenecks organization-wide.
- Engineered a Google Drive-like Data Management System using React.js, Material-UI, and Redux for 100+ internal users, eliminating 100% of manual paperwork for the client.
- Developed RTI (Right to Information) application with responsive design and compatibility across 5+ browsers; improved user engagement by 25% and reduced bounce rate by 15%.
- Accelerated team productivity by standardizing GitHub Copilot and ChatGPT for AI-assisted development, cutting repetitive coding tasks by 35% and improving sprint velocity.
- Integrated Stripe and PayPal payment gateways end-to-end, increasing successful transaction rates by 60% and reducing invoice processing time by 15%.
- Standardized Docker-based local development environments, reducing new developer onboarding time to under 1 day and eliminating environment-specific bugs entirely.
- Delivered a scalable data pipeline processing 50,000+ data points daily at 99% accuracy; owned system design, API integration, and full technical documentation.
- Resolved 100+ Jira tickets across bug fixes, features, and regression issues — maintaining zero critical bugs in production across multiple release cycles.

KEY PROJECTS

ATS Resume Optimizer & AI Interview Coach: End-to-end AI product built with React 19, Vite, Tailwind CSS, and Groq API (Llama 3.1). Delivers ATS scoring (0-100), keyword gap analysis, multi-format resume parsing (PDF/DOCX/TXT), adaptive AI interview questions, real-time feedback with 20+ quality indicators, voice practice via Web Speech API, and DOCX export. Improves ATS match rates from 30% to 80%+.

Moviesverse: React.js and Redux Toolkit SPA consuming TMDB API (500K+ titles) for real-time movie and TV search. Implemented RTK Query for efficient caching, achieving sub-1s load times with full performance optimization.

FlowBoard (Jira Clone): React.js project management platform with task tracking, bug management, sprint planning, and drag-and-drop boards. Reduces coordination overhead by 90% with real-time status updates and multi-member collaboration.

EDUCATION

B.Tech in Information Technology

2018 – 2022

Guru Gobind Singh Indraprastha University, New Delhi

ACHIEVEMENTS

- Young Frontend Developer of the Month (Jun–Aug 2022): Recognized for outstanding React.js and Material-UI design skills within 3 months of joining Costacloud.
- Launched ATS Resume Optimizer and AI Interview Coach — a production AI tool integrating Groq/Llama 3.1, helping job seekers boost ATS match rates from 30% to 80%+.
